

EP43™ Rod Stock	Characteristics	Applications
	<ul style="list-style-type: none"> • Injection moulded reinforced polyphenylensulfid based and modified bearing material • Good chemical and hydrolysis resistance • Very low friction, optimised for dry running conditions • High dimensional stability • Rod stock for prototypes and small series production • Colour: brown 	<p>General Generally applicable within the limits of the material properties</p> <p>Industrial Domestic appliances, materials handling equipment, apparatus engineering, slot machines and cash boxes and many more</p>

Composition & Structure	Operating Conditions		Availability
Injection moulded thermoplastic dry bearing material PPS + PTFE + Aramid	dry oiled greased water process fluid	very good good good fair good after resistance testing	<p>Ex Stock</p> <ul style="list-style-type: none"> • Rod stock <p>To order</p> <ul style="list-style-type: none"> • N/A
